SKILLS

TECHNICALS:

- **Backend** : Java , JEE, Spring Boot & Microservices
- **Frontend** : Angular, React.js, Tailwind
- **Bases de Données** : PostgreSQL, MySQL, MongoDB, Redis
- **DevOps & Cloud** : AWS, Terraform, Kubernetes, Jenkins
- **CI/CD & Gestion de Code** : Git, GitHub, GitLab
- **Tests & Performance** : JUnit, Mockito, Postman, JMeter
- **Systèmes & Automatisation**: Python - Bash

SOFT SKILL

- **Flexible - Autonomous**
- **Agile - Teamwork**
- **Rigorous – Dynamic**

LANGUAGE

- **English: Fluent**
- **French: Fluent**
- **Arabic: Native**

Interests

- Video Game
- Sport
- Commitment and Community

Professional Experience:

Diot Sciacy Technology | 07/2025 – Now:

Software Development Engineer

- Development and enhancement of applications for the insurance sector
- Design and implementation of new business features
- Optimization of application performance and user interface
- Bug fixing and continuous improvement of platform stability
- Participation in a marketing campaign project integrating artificial intelligence
- Implementation of CI/CD pipelines for deployment automation

Tech Stack :Java 21, Spring Boot, Angular 19, FastAPI, PostgreSQL, K8S, GitLab CI

EASYPEASY (HORIZON GROUP) | 02/2025 – 06/2025 :

FullStack Java Engineer

- Development and enhancement of an insurance management platform
- Design and integration of new backend features
- Continuous improvement of existing services and bug fixing
- Participation in the implementation of a high-performance microservices architecture
- Contribution to the deployment and monitoring of services on AWS

Tech Stack : Java 21, Spring Boot, Microservices, PostgreSQL, AWS, CI/CD

EAMBITION | 09/2024 – 01/2025 :

Backend Java Developer (Internship)

- Development of robust backend applications in Java
- Design and optimization of backend architectures
- Improvement of application performance and software quality (+40% through unit and integration testing)
- Integration of CI/CD pipelines and participation in deployment automation
- Collaboration in managing application environments and monitoring deployments

Tech Stack : Java 17, Spring Boot, PostgreSQL, Kubernetes 1.31, Jenkins, SonarQube, , ArgoCD

OFFZONE AGENCY | 02/2024 – 08/2024:

FullStack Java Engineer (Internship)

- Development of a comprehensive electronic health platform
- Design and implementation of backend features using Spring Boot
- Frontend development in ReactJS for a smooth and accessible user interface
- Management of appointments, patient records, and secure communication between healthcare professionals
- Contribution to integration and deployment using Docker

Tech Stack : Spring Boot, MySQL, ReactJS, Docker

SMART-M | 10/2023 – 01/2024 :

FullStack Java Engineer (Freelance)

- Participation in the development of an online SaaS platform for property management
- Design and implementation of backend features using Spring Boot
- Frontend development to deliver a smooth user experience
- Close collaboration with the team to ensure seamless integration between backend and frontend
- Contribution to cloud architecture and deployments on AWS using Terraform

Tech Stack : Spring Boot, ReactJS, PostgreSQL, AWS, Terraform

Education & Degrees:

State Engineer in Computer Science. National School of Applied Sciences (ENSA), Marrakech

- Juin - 2024

Baccalaureate in Mathematical Sciences, Option B

ERRAZI, Settat

- 2018 - 2019
